

McKesson Integration for RightFax

The healthcare industry is driven by many specialized documents including claims information, lab reports and admittance records. Timely, secure and efficient delivery of these documents is essential for patient-focused and cost-conscious healthcare organizations. Complying with government regulations and initiatives (such as HIPAA and Meaningful Use) that dictate how these communications are handled is also an important consideration.

RightFax integration with McKesson systems can provide enterprise fax and e-document delivery capabilities. Authorized users and departments can send, receive and track sensitive personal health information and other important documents in a secure, reliable and efficient way. This helps organization gain the most from their healthcare information systems, meeting all regulatory and compliance goals.

RightFax solutions can help address the challenge of delivering and managing medical records and other documents by providing the tools to electronically send and receive documents from the desktop, automating document delivery from a variety of clinical and back-office applications, organizing them for quick retrieval and archiving purposes. This provides healthcare organizations with the flexibility to securely distribute virtually any document from any application, using a centralized fax and document management solution.

Benefits

- Support HIPAA and Regulatory Compliance
- Cuts document delivery costs
- Improves efficiency and reliability
- Provides secure (encrypted) delivery of information
- Reduce paper handling and manual processes
- Clinical Platforms that Integrate with RightFax

Many clinical application vendors recommend their customers use RightFax solutions alongside their existing systems so they can get the most benefit from their platforms. This includes not only EMR and EHR platforms, but also radiology, lab, pharmacy, and claims processing systems. Below is a sample of the clinical platforms that integrate with RightFax.

Epic	GE Healthcare	Cerner	NextGen	IDX Healthcare
McKesson	Nuance	MedPlus	Allscripts	Healthland
Athena Health	EpicCare	Aprima Medical	Vistar VIP	MediTech
MediTab Software	gloStream	ABELMed	CureMD	Doctations
