

# RightFax Integration for HP

RightFax integrates with HP MFPs and Digital Senders to consolidate all faxing services on the network, giving users convenient access to faxing capabilities on the same devices used daily for printing, scanning and copying. The MFP Module provides an easy-to-use integration platform for integrating RightFax with MFPs and HP Digital Senders. It offers HP and RightFax users a tested and tightly integrated solution that delivers documents securely throughout the organization and externally to customers, suppliers and partners.

Note: RightFax supports all devices that support HP Digital Sending Software (DSS) Version 3.0 or later.
