

# RightFax Integration Module

The RightFax Integration Module automates delivery of documents from CRM, ERP, host, legacy and other back-office applications. It reduces costs, streamlines business processes and enhances efficiency by providing real-time, unattended electronic delivery of vital business information via fax, email, certified email, encrypted PDF, or SMS— often without changes to existing applications.

The Integration Module is only available for following RightFax editions: Enterprise Server, Enterprise Suite or Enterprise Integration.

## The RightFax Integration Module allows you to:

- Deliver production-oriented, high-volume, batch documents electronically directly from back office applications without modifying the data stream.
- Utilize numerous host notification and delivery confirmation methods.
- Make use of intelligent data recognition and integration tools including: facsimile command language (FCL), production-embedded codes, RightFax XML Interface and RightFax Java API.
- Take advantage of capabilities such as:
  - Forms overlay
  - Flexible scheduling with multiple priority levels
  - Faxing from multiple applications
  - Fax status notifications
